Bancroft as it was in the early 60's. We had a house wall phone only. We all shared the one phone and not only our family shared, but we also shared our phone with 4 other homes. Try that now! We had a certain ring three long and two shorts, one or other combos. So we just answered when we heard our ring. Of course we all eavesdropped on each other. We listened to everyone's phone call. We had Jo Echols on our line. I can't remember the others. We had no problem sharing like that either. Now a days everyone has their own phones and they talk in private.

We had one TV and we had three stations. Someone had to go outside and turn the antenna everytime we turned the station. Someone inside the house would say hold it, it's clear and it Television was free to. There was nothing off color in any of the programs. All were family rated. All clean cut and wholesome. No such thing as R rated existed. The whole family would watch and lots of comedies. Now we have three TV's and 500 or so stations. I still watch channel 3, 8 and 13 a lot.

Dog POO Complaint: Dear Bancroft residents if you walk your dog please take a bag with you and clean up their mess. It's not right that others have to clean up your dog's mess before we mow our yard. **Wally Harper.**

Suggestion please take a bag with you when you walk your dog in town..

Thank you! **Editor**

Town Picnic: August 27th. get ready to have a good time with your neighbors.

Town cleanup day: Sept. 10th. We will be having another clean up day. So get ready to get rid of unwanted things. For Bancroft residents only. No mattresses.

Bancroft Volunteer Fire Department

Electrical Safety

- Have all electrical work done by a qualified electrician.
- Only use one heat-producing appliance (such as a coffeemaker, toaster, space heater, etc.) plugged into a receptacle outlet at a time.
- Test AFCIs and GFCIs once a month according to the manufacturer's recommendations. You do not need a flame to start a fire. Fires can start when heat builds up near things that burn. This can happen when a hot light bulb is near things that burn, such as cloth or paper, or a cord has been placed under a carpet.
- Check electrical cords to make sure they are not running across doorways or under carpets. Extension cords are intended for temporary use. Have a qualified electrician add more receptacle outlets so you don't have to use extension cords.
- Major appliances (refrigerators, dryers, washers, stoves, air conditioners, microwave ovens, etc.) should be plugged directly into a wall receptacle outlet. Extension cords and plug strips should not be used.

We Would like to give a Congratulations to our Members who Graduated this Year
